## ABSTRACT OF THE DISCLOSURE

~~A fixture for anchoring in bone tissue. The fixture has a fixture~~ having an anchoring portion and an application portion intended for connection to a prosthesis. The application portion has an outer end and an end connected to the anchoring portion. The application portion includes a flared part whose outer dimensions widen from the end of that part connected to the anchoring portion in a direction ~~towards~~ toward the outer end of the application portion. This flared part is elastically resilient transversely to the longitudinal direction of the fixture. ~~The invention also relates to the use of such a fixture for securing the application of a prosthesis.~~
